Vanguard Australian Fixed Interest Index ETF
On page 4 of the PDS, the fourth paragraph of the section entitled Investment strategy and investment return objective is deleted and replaced with the following:

“The Fund aims to hold an appropriate number of fixed and floating rate securities so as to produce a portfolio risk exposure consistent with that of the index. This is generally achieved by holding a representative sample of the securities included in the index or securities that provide similar characteristics to those securities in the index. Vanguard selects the securities it holds based on liquidity, access to markets, portfolio cash-flow and minimum trade quantities with the aim of tracking the return of the index. Security weightings in the Fund may vary from the index weightings. The Fund may exclude certain securities that are included in the index or may invest in securities that have been or are expected to be included in the index.”
